

Name: _____

Plusrechnen im zweiten Zehner

$2 + 5 = \underline{7}$

$8 + 1 = \underline{9}$

$3 + 2 = \underline{5}$

$12 + 5 = \underline{17}$

$18 + 1 = \underline{19}$

$13 + 2 = \underline{15}$

$1 + 3 = \underline{4}$

$4 + 4 = \underline{8}$

$5 + 2 = \underline{7}$

$\underline{11} + \underline{3} = \underline{14}$

$\underline{14} + \underline{4} = \underline{18}$

$\underline{15} + \underline{2} = \underline{17}$

$\underline{2} + \underline{7} = \underline{9}$

$\underline{3} + \underline{2} = \underline{5}$

$\underline{3} + \underline{3} = \underline{6}$

$12 + 7 = \underline{19}$

$13 + 2 = \underline{15}$

$13 + 3 = \underline{16}$

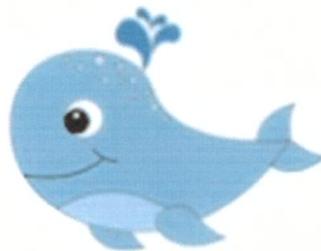

Male die große und die passende kleine Rechnung mit der gleichen Farbe an.

$13 + 4 = \underline{17}$

$12 + 7 = \underline{19}$

$15 + 3 = \underline{18}$

$1 + 2 = \underline{3}$

$11 + 2 = \underline{13}$

$2 + 7 = \underline{9}$

$3 + 4 = \underline{7}$

$5 + 3 = \underline{8}$

Was stellst du fest?

$7 + 2$

$12 + 5 = \underline{17}$

$10 + 8 = \underline{18}$

$17 + 2 = \underline{19}$

$13 + 4 = \underline{17}$

$12 + 6 = \underline{18}$

$15 + 4 = \underline{19}$

$14 + 3 = \underline{17}$

$14 + 4 = \underline{18}$

$13 + 6 = \underline{19}$

$\underline{15} + \underline{2} = \underline{17}$

$\underline{16} + \underline{2} = \underline{18}$

$\underline{11} + \underline{8} = \underline{19}$

Das Ergebnis ist immer: 1 größer . 1 kleiner . gleich .
